OBJECTIVE

Python Backend Engineer specializing in asynchronous, high-throughput architectures and real-time data pipelines. Proven expertise in utilizing FastAPI and Uvicorn to resolve complex server bottlenecks and optimize API performance. Seeking a software development role to architect scalable, resilient, and non-blocking enterprise systems.

EXPERIENCE

Python DeveloperApril 2026 – Current

WebXion Technologies LLP, Pune

- Engineered a high-throughput FastAPI and Uvicorn backend to asynchronously ingest real-time webhooks from WhatsApp and RCS messaging APIs.
- Eliminated server choking and resource bottlenecks under peak traffic by offloading heavy payload parsing and database operations to non-blocking background tasks.
- Optimized API response times by decoupling the ingestion layer from business logic, ensuring instant webhook acknowledgment alongside robust JSON validation for zero-drop message routing.

AI Resercher InternMarch 2026 – April 2026

WebXion Technologies LLP, Pune

- Conducted a comprehensive **feasibility study and technical report** on integrating Claude AI into organizational workflows to optimize development efficiency.
- Migrated legacy PHP backend to **Python (FastAPI)**, implementing asynchronous **REST APIs** for improved performance and scalability.
- Developed modular scripts to ensure 100% data consistency during the architectural transition from PHP.

Java Development InternJan 2025 – May 2025

Benchmark IT Solutions, Pune

- Developed RESTful APIs and integrated MySQL schemas using Spring Boot, JPA, and Git.
- Built responsive dashboards and full-stack web applications with ReactJS, Vite, and TypeScript.
- Migrated JavaScript codebases to TypeScript, applying OOP and SOLID principles for maintainability.

EDUCATION

B.Tech Computer Science and Engineering (AI & Data Science),2025

MIT World Peace University,

CGPA: 8.23

Class 12, CBSE, Elpro International School2021

Percentage: 90.2

Class 10, CBSE, Global Indian International School2019

Percentage: 90.6

SKILLS

Languages	Python, Java, JavaScript, TypeScript, SQL, C/C++, HTML/CSS
Frameworks	ReactJS, Spring Boot, REST API, JPA, JDBC, Vite
Technical Skills	Machine Learning, Data Analysis, Web Development, UI/UX Design,
Tools	VSCode, Git, MySQL, Tableau, Power BI, Figma, Material UI, PyTorch
AI Engineering	Claude Code (Agentic Integration), Gemini API, Local LLM Deployment.

PROJECTS

Super-Resolution using GAN. Developed a GAN-based model to upscale low-resolution images using pytorch while preserving fine details. Implemented a two-stage architecture using RRDBNet and evaluated model performance using PSNR, SSIM, MSE, and Inception Score metrics to ensure high visual quality.

Demand Forecast for Optimized Inventory Planning. Developed a Random Forest-based model to forecast future retail item demand using historical sales data and product features. Implemented proactive inventory planning strategies to minimize overstocking and shortages. Evaluated performance using Mean Absolute Error and Mean Squared Error metrics, leading to improved operational efficiency and reduced inventory costs.

Medical Insurance Cost Prediction. Developed a Linear Regression model to predict medical insurance costs using features such as age, gender, BMI, smoking habits, and region. Applied data visualization to identify correlations and key trends, and evaluated performance using regression evaluation metrics for accuracy and reliability.

Mira Food Delivery Chatbot. Built a food delivery chatbot using Google’s Dialogflow ES with well-designed user intents for smooth conversations. Used SQL for backend tasks like real-time order placement, menu browsing, and delivery tracking, improving user satisfaction and efficiency with quick responses and personalized support.

ACHIEVEMENTS

- Qualified GATE 2026 in Data Science and Artificial Intelligence in general category.

CERTIFICATION

- | | |
|---|-----------------------|
| • Complete Python Developer – Udemy | Jan 2024 – June 2024 |
| • National Academic Immersion Programme on AI – IIT Jodhpur | Feb 2024 – March 2024 |

EXTRA-CURRICULAR ACTIVITIES

- Rubik’s Cube
- Football
- Running
